

### Portfolio Holder Mission Statement

Thurrock Council is committed to improving Air Quality, creating a healthier and greener environment for its residents and business, ensuring that it is tackling Climate Change seriously and providing new opportunities for residents and businesses.

Thurrock Council, will continue to work with residents, health partners and businesses to ensure that, following the Air Modelling assessment, a series of new encompassing strategies which will transform Thurrock's clean air and green agenda, will be put forward for the end of 2020. Each new strategy will ensure the Council delivers on:

- o Improving Air Quality in line with data modelling results and increased collaboration with external partners
- o Create a healthier outcome which can be modelled with health partners and tested to ensure not only is it improving air quality but providing healthier outcomes
- o Be a part of the overall greener agenda
- o Work in tangent with the Local Plan
- o Work in tangent with planning and Thurrock developments

Within the period of modelling, the Council and its internal departments will continue to work on delivering clean air strategies which can be carried out now and will encompass the core principles of new strategies.

The Council, working with the relevant Portfolio Holder and Corporate Overview and Scrutiny Chair will create new KPIs for the 2021/2022 financial year to accompany Air Quality improvements.
