Subject: Soundon application

With regards to the application for the Soundon music Festival, I would like to raise a representation in relation to all 4 licensing objectives.

The application makes reference to an Event Management Plan that has not been supplied including appendices with the application until 13th may 2016. This is three days before the close of the consultation period, which at this stage has not left sufficient time to review the plan to be satisfied that the licensing objectives are being satisfactory.

Many Thanks

Paul Adams

Principal Licensing Officer.
